PROFESSIONAL SUMMARY

Full-stack web developer at Onwords Private Limited building production web applications with React, Next.js, NestJS, Python and PostgreSQL/Supabase. Built a client website (Kalyan Finance), a trial interior-design site (Neema Homes) and a production direct-selling platform with online payments, payouts and a commission engine. Also builds AI tools with the Claude API (retrieval-augmented answers, ticket triage) and Windows and Android apps. Works with Git/GitHub and GitHub Actions, and deploys to Vercel, Cloudflare and Supabase.

PROFESSIONAL EXPERIENCE

Web Developer — Onwords Private Limited *Chinniyampalayam, Coimbatore | 2026 – Present*

- Develop and maintain responsive websites and web applications based on project requirements.
- Work across frontend and backend development, including Python-based web functionality and REST APIs.
- Design user-friendly responsive interfaces and integrate frontend components with backend functionality and APIs.
- Work with databases and SQL for application data management; debug, test and improve website and application features.

PROJECTS

Mutual Aid House — Direct Selling Platform (client project, built at Onwords) mutual-aid-house.vercel.app

NestJS, Prisma, PostgreSQL, Next.js, Cashfree Checkout & Payouts, GitHub Actions, Supabase Edge Functions, Cloudflare Pages

- Built a product shop with Cashfree checkout, a member network with a binary commission engine, and wallets paid out to bank or UPI after KYC.
- Implemented refunds with commission clawback, scheduled payout jobs, an admin panel (members, genealogy tree, commissions, payouts, KYC, Excel reports) and a member area.
- Stored money as integer paise; added unit, end-to-end API and browser UI tests; automated deployment with GitHub Actions.

Neema Homes — Interior Design Website (trial project at Onwords, not launched) neema-homes-nine.vercel.app

React 19, Vite, Supabase (Auth, Row-Level Security, Storage), Vercel

- Developed a responsive website for an interior design and modular kitchen business with room pages, project gallery, hero slider and a price calculator.
- Built a private admin dashboard to manage gallery content and enquiries in Supabase, secured with Supabase Auth and row-level security; tracked the schema as migrations.

Kalyan Finance — Finance Website (client project, built at Onwords) kalyan-finance.vercel.app

React 19, React Router, Vite, Vercel

- Developed a multi-page responsive finance website with an English/Tamil language toggle, a loan repayment calculator, a video hero and a validated enquiry form.
- Worked on colour systems, visual assets, customer-focused content structure and SEO-friendly page organisation.

Support Pilot AI — AI Support & Operations Copilot (personal project) github.com/binumadhavan2-prog/support-pilot-ai

Next.js 16, TypeScript, PostgreSQL + pgvector, Drizzle ORM, Claude API, Tailwind CSS, Docker

- Ticket system where Claude triages tickets and drafts replies grounded in company documents with source citations; a human approves every reply.
- Multilingual retrieval (English, Hinglish, Tanglish) with local embeddings and pgvector; role-based access, multi-tenancy, SLA timers and analytics.

Kavacham — Windows Security & Cleanup App (personal project)

Python, Tkinter, Windows APIs, PowerShell, ADB

- Antivirus companion combining Microsoft Defender scans with its own engine (SHA-256 signatures, heuristics, quarantine), URL reputation from threat feeds, USB and Android phone scanning, a security checkup and junk cleaning.

Monkey Play — Desktop & Android Companion (personal project) github.com/binumadhavan2-prog/monkey-play

C#, Java (Android), Open-Meteo API, Claude Code

- Animated desktop companion with reminders, music-reactive dancing, weather forecasts and an AI chat; released as a Windows app and an Android app.

BIGMART — Online Grocery Management Web Application *Academic Project, Luminar Technolab, Kochi | 2022 – 2023*
Python, SQL, MySQL, HTML, CSS

- Designed and developed a web application for online grocery transactions and product management with database-driven functionality.

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, SQL, C#, Java
Frontend	HTML, CSS, React, Next.js, Tailwind CSS, Vite, Responsive Web Design
Backend	NestJS, Node.js, REST APIs, Prisma, Drizzle ORM
Databases	PostgreSQL, MySQL, Supabase (Auth, RLS, Storage), pgvector
AI	Claude API, Retrieval-Augmented Generation (RAG), Claude Code
Integrations	Cashfree Checkout & Payouts, Resend email, Open-Meteo
Tools & Deployment	Git, GitHub, GitHub Actions, Docker, VS Code, Vercel, Cloudflare Pages, Supabase Edge Functions
Other	Website Design, UI/UX, Debugging, Testing (unit, end-to-end, browser), SEO Basics

EDUCATION

Bachelor's Degree — SAN International College of Arts and Science, Walayar | 2019 – 2022
Certificate Course (Full Stack Development) — Luminar Technolab, Kochi | 2022 – 2023
Python Development Training — Meta Scifor Technologies Pvt Ltd | Nov 2024 – Feb 2025 (Certificate ID: MST25260010)
Higher Secondary Certificate — GHSS Thenkurissi, Kerala | 2017 – 2019
SSLC — GHSS Thenkurissi, Kerala | 2017

CORE STRENGTHS

Problem Solving • Analytical Thinking • Team Collaboration • Adaptability • Creative Thinking • Continuous Learning

LANGUAGES

Malayalam — Native • English — Proficient • Tamil — Proficient • Hindi — Intermediate
